Subject: MLA/2016/00227

Dear David,

I understand from my colleague Jan that you are happy for me to email you my comments on MLA/2016/00227.

I have read all of the documents in the application and am familiar with the DWDR project through previous site visits and inspections. There is enough information provided in the application and supporting documents to enable me to understand the scope of the works, the method and equipment that will be used, and the timings.

The reports contain detailed information on commercial and fishing activity in the area, which includes information provided by the KEIFCA, that I concur with based on my local knowledge. Information on seasonality of the local fisheries and spawning has already been provided.

I don't have any additional local knowledge about the condition of local conservation areas, or any other projects planned or in progress, beyond data held on SPIRIT and what is in the application documents which you should be aware of.

Consequently, based on what I have read, I don't think there is anything else further I can add.

Please let me know if you need any clarification or any further information.

Kind regards,
Verity.
